Not for Resale

Replace the bitstreams with those provided, which are suffixed _new.

Replace 6.6.18.1.3, HE AAC v2 profile:

if the SBR bitstream element bs_header_flag is 1, enable_ps_header shall be encoded with the value 1 and iid_dt, icc_dt, ipd_dt (if present) shall be encoded with the value 0.

with the following (where changes are highlighted in grey):

if the SBR bitstream element bs_header_flag is 1, enable_ps_header shall be encoded with the value 1 and iid_dt[0], icc_dt[0], ipd_dt[0], opd_dt[0] (if present) shall be encoded with the value 0 and num_env shall not be encoded with the value 0.

At the beginning of 6.6.18.2.4, before Table AMD11.1, add:

All bitstreams also exist with the suffix _new. These are preferred for conformance testing while the ones without this suffix are non-conformant and therefore deprecated.
