INTERNATIONAL STANDARD
RECOMMENDATION ITU-T

Information technology – Open Systems Interconnection – The Directory: Selected attribute types

Technical Corrigendum 3

(covering resolution to defect report 322)

1) Correction of the defects reported in defect report 322

a) Change the first paragraph of Annex C from:

This annex includes all of the suggested upper bound value constraints used in these Directory Specifications, in the form of the ASN.1 module **UpperBounds**.

to:

This annex includes an example set of upper bound value constraints that might be applied to these Directory Specifications. It is in the form of the ASN.1 module **UpperBounds**. It should not be taken as a recommendation that these values should be used. In many cases, the values may be found to be too low.

b) In the **UpperBounds** *module, change:*

```
ub-name                    INTEGER    ::=    64
```

to:

```
ub-name                    INTEGER    ::=    128
```
