Tentative Interim Amendment

NFPA 57

Liquefied Natural Gas (LNG) Vehicular Fuel Systems Code

2002 Edition

Reference: 2.12.1.2
TIA 02-1 (NFPA 57)

Pursuant to Section 5 of the NFPA Regulations Governing Committee Projects, the National Fire Protection Association has issued the following Tentative Interim Amendment to NFPA 57, Liquefied Natural Gas (LNG) Vehicular Fuel Systems Code, 2002 edition. The TIA was processed by the Vehicular Alternative Fuel Systems Committee, and was issued by the Standards Council on October 3, 2002, with an effective date of October 23, 2002.

A Tentative Interim Amendment is tentative because it has not been processed through the entire standards-making procedures. It is interim because it is effective only between editions of the standard. A TIA automatically becomes a proposal of the proponent for the next edition of the standard; as such, it then is subject to all of the procedures of the standards-making process.

1. Replace proposed text from NFPA 57 ROP, Log 57-12 with the following:

2-12.1.2 Vehicular fuel containers shall be permitted to be located within or below the driver or passenger compartment provided all connections to the container(s) are external to, or sealed and vented from, the compartment.
